POC Name Daniel Tepper	POC Phone 213-905-2294	POC Email Daniel.Tepper@uscis.dhs.gov	
Description USCIS External Affairs (EXA) formerly known as Customer Service Public Engagement Directorate (CSPED) requires services to support calls and chats using a customer engagement center model that employs a mix of web and voice channels for customers to obtain assistance on citizenship and immigration related information. This request is for the contractor to operate, furnish the Contact Center, and provide sufficient operational staff to support the Contact Center interactions and collaborate with the USCIS and other supporting Contractors involved in improving operations. Ultimately, the goal of this effort is to support the phone, chat, and e-services channels of a multi-channel Contact Center that is fully integrated with Genesys, Salesforce/STARS, Verint (NICE/InContact), Aria CIMPlicity. The approximate value of calls is 600k on a monthly basis. The intent is to pursue an award using GSA's IT-70, ACCS track for a 12-month base period and four 12-month option periods.

Incumbent Lionbridge; Language Line; Transperfect		Contract Number HSSCCG-15-A-00001; HSSCCG-15-A-00016; HSSCCG-15-A-00017	Contract Complete April 30, 2025
Estimated Release Feb. 21, 2020		Anticipated Award Quarter Q3 2020	
POC Name Margaret Mayers	POC Phone (202) 272-1566	POC Email Margaret.M.Mayers@uscis.dhs.gov	
Description The USCIS Asylum Division has a requirement for interpreting and interpreter monitoring services for a diverse set of languages spoken by applicants applying for Asylum or in the Credible Fear or Reasonable Fear screening process. Monitoring services are typically used for applicants who are required to or opt to bring their own interpreter for the USCIS interview. Direct interpretation is required in cases where USCIS is required to provide the interpreter for the applicant or in other circumstances. The majority of the need is for over the phone on demand interpretation and monitoring, though pre-scheduled over the phone interpretation/monitoring may be required. Interpretation needs may also include video conferencing or in person interpretation depending upon the circumstance, though at this time these requests are infrequent. The majority of this work will be at a contractor facility/location deemed by the contractor within the United States and its territories; the majority of services will be provided over the phone to USCIS. The intent is to issue a multiple award BPA with a five year period of performance using GSA PSS schedule, SIN - 382 2, Interpretation Services.			

APFS Number F2019046502	NAICS Code 561110	Component U.S. Citizenship & Immigration Services	Sub-component None

Description USCIS requires card consumables and an integrated state-of-the-art solution that is configurable for various immigration benefits including the Permanent Resident Card (PRC) and Employment Authorization Document (EAD). USCIS is committed to taking a proactive approach in order to remain ahead of the threat of document tampering, counterfeiting and fraud by periodically upgrading and enhancing security features. Cards shall be laser engraveable, tamper-resistant and durable solid polycarbonate body with RFID and optically variable/holographic-like images embedded within the card construction substrate layers that are compliant with U.S. and international identification card standards. Requirements also include card design service, secure storage for card stock at the vendor's manufacturing facilities, delivery to USCIS production facilities, and related technical support services. USCIS requires a base card design that can be configurable for our current secure identification documents, as well as any potential immigration benefits including background artwork, security features and optically variable/holographic-type images. Cards must be capable of being personalized using current USCIS laser engraving technology. The Contractor shall deliver a combined volume of up to 4.5 million PRC and EAD cards annually. In addition, the Contractor shall demonstrate the capability to support potential "surge" in PRC and EAD card demand for up to 9 million cards annually to support possible future immigration requirements. This will be an open market solicitation.

Description The US Customs and Border Protection, United States Border Patrol (USBP) and the Office of Field Operations (OFO) across the United States Southwest Border Area of Operations (SWB AOR), have a requirement for prepackaged meal delivery for detainees held in temporary custody. This action will establish a Multi-Award Blanket Purchase Agreement (BPA), to service the below listed USBP Sectors and OFO Field Offices. Prospective Offerors shall be allowed to propose to all or just some locations, and all or just some requirements. The purpose of this procurement action is to establish 5-year agreement(s) with multiple vendors to become a one-stop shopping tool for the provision of detainee meals. Most locations required up to 900 meals per day (300 breakfast, lunch and dinner), but requirements shall vary, with contracts and purchase card orders to be placed against the established BPAs. The following USBP Sectors and OFO Field Offices shall be included in this requirement: (1) San Diego Sector and San Diego Field Office, (2) El Centro Sector, (3) Yuma Sector, (4) Tucson Sector and Tucson Field Office, (5) El Paso Sector and El Paso Field Office, (6) Marfa Sector, (7) Del Rio Sector, (8) Laredo Sector and Laredo Field Office, and (9) Rio Grande Valley Sector.

Description

This effort is a technology support contract. The acquisition of these services to DAC-TER is associated with OFO's "path Forward RPM Recapitalization" effort. The acquired support services will be leveraged for the development and integration of tools and software that will be utilized to monitor and improve systems and communication health between ARDIS and lateral CBP RPM and NII systems. These services are forecasted to promote a cost savings in existing operations and improve efficiencies in operations of ARDIS and interconnected systems. ARDIS is a platform technology allowing the electronic transmission of RPM and NII data via the CBP network to the DAC-TER database for implementation tools assessing, in near real time, nuc/rad threats and health status of RPMS.

Description The Brownsville location require HVAC replacement/upgrade, in part due to a 2010 ban on the production of new equipment using refrigerant R-22 and expected 2020 ban on production/import of refrigerant R-22. Due also to decreasing availability of R-22, the cost has significantly risen. Therefore, moving to a more available refrigerant such as R410A, 407C &134A are desired. This replacement and upgrade will also address current facility concerns with the aging HVAC equipment involving energy efficiency, significantly old and damaged equipment conditions, and increased maintenance and operational cost.

Description

The Department of Homeland Security (DHS) U.S. Citizenship and Immigration Services (USCIS) Field Operations Directorate (FOD) is facing a mission challenge to expand the volume of immigration benefit applications that are processed without further increasing existing backlogs and/or processing times, while maintaining and improving security and fraud detection, all without substantially increasing the current staffing level. FOD is soliciting the assistance of a highly experienced and knowledgeable contractor with staff who can deeply comprehend and consider mission objectives and provide expert support as FOD develops, tests, implements and integrates solutions that will realize significant efficiency gains throughout its operational processes within the immigration domain. FOD has already developed the strategic framework of a reimaged business model (the USCIS Adjudication Service Blueprint) that outlines a future segmented business process and corresponding set of enabling concepts. FOD has also already established a mature, agile Program Management Office (PMO) to provide the leadership, accountability and management structures needed to ensure the successful delivery of numerous interrelated projects. In delivering the business vision outlined in the Blueprint, the FOD PMO seeks a partner to support program management, portfolio and project management, integration, planning, concept exploration, communications and change management, facilitation, and business and data analysis. This will include identifying and resolving the multitude of diverse challenges and risks inherent in managing a complex business transformation effort, and will require innovation and creativity in problem solving in addition to technical expertise as the contractor works collaboratively with the federal staff. Successful implementation of the Blueprint vision into operations across the Directorate will change business processes and affect work culture, require modifications to existing policies and procedures, and necessitate enhancements to, or new development of enabling technologies. This initiative will directly impact the Directorate's approximately 7,500 employees' work activities.

Description The TACCOM Modernization Program must have an unbiased evaluation on an annual basis. Program ownership costs, such as operations including service contracts, and disposition, can easily consume as much as 80% of the total lifecycle costs. Operations are a critical area where improved effectiveness and productivity can have the greatest net measurable benefit in cost, performance, and mission accomplishment. Both OMB and DHS require Investments in operations to perform either a Post Implementation Review (PIR) or Operational Analysis. OMB and DHS require the submission of OAs and/or PIRs as part of the Major Business Case. This analysis is designed to measure the effectiveness of acquisition programs in meeting strategic, business, and stakeholder needs as well as financial performance as dictated in the DHS Instruction Guide 102-01-001 – Operational Analysis Guidebook.

Description The U.S. Custom House, located in San Juan, is a Spanish Colonial Revival style building listed on the National Register of Historic Places. Built in 1924, and expanded almost immediately and completed in 1931, it has been in the continuous ownership and use by the United States Customs and Border Protection (CBP). It is currently used for field operations and cargo processing. The building is located in the La Puntilla section of Old San Juan, facing San Juan Bay on one side and surrounded by city streets on the other three. The two-story building is approximately 65,500 square feet in size. The first-floor houses offices, an analytical laboratory, warehouse, and garage, and the second-floor houses executive and administrative offices surrounding two large, open courtyards. CBP is the sole occupant. The physical address of the building is #1 Calle La Puntilla, San Juan, Puerto Rico 00901. Given that this facility is listed on the National Register of Historic Places, all renovation work will need to follow strict guidelines with regard to preservation of historical fabric for this project. The local State Historic Preservation Office (SHPO) in Puerto Rico has been involved with the design of this project. The construction drawings and specifications reflect the requirements of the SHPO accordingly.

Description To procure labor, supervision, tools, materials, parts, equipment, transportation, licenses, permits, certifications and management necessary to perform repairs and improvement services for TI assets in support of the CBP Tactical Infrastructure Portfolio. The majority of the technical support requirement will focus on tasks of maintenance, repair and improvement services specifically, performing activities for repairing the TI real property portfolio within the Del Rio and Big Bend East Sectors in Texas and in conjunction with CBP activities associated with border fences, buildings, structures, towers and access roads along the southwestern U.S./Mexico International border. Maintenance includes work required to preserve real property or equipment in such a condition that it may be effectively utilized for its designated purpose. The term includes work undertaken to prevent damage and/or failure that otherwise would be more costly to restore. Repairs include work to restore an existing asset to pre-existing condition and level of performance so that it may be effectively utilized for its designated purpose. Improvements include work that enhances the mission and functional capabilities of an asset through an addition, expansion, or adaptation. Any improvements included in this work effort will be confined to the existing TI footprint.

POC Name Derril McDonald	POC Phone 619-690-7743	POC Email derril.mcdonald@cbp.dhs.gov
Description The San Diego Sector has multiple buildings that have failing Flat roof systems. The overview map and listing provides precise building locations, annotated with BE/BU. The buildings are single story, concrete masonry unit (CMU) wall and wood/steel frame design. The decks range from rubber membranes, asphalt cap sheet and metal standing seam. The locations provide environmental challenges that have drastic fluctuations in temperatures throughout the year. This expansion and contraction of roofing materials, pulls seams apart causing leaks. The cost value of repairing constants leaks and failed seams does not warrant the standard approach to roof repairs. The roofs have documented failures and leaks for the past 10 years and are in need of replacement or repair. The 2018 CBP Facility Condition Assessment listed; Roof Construction B1020 current status as "Action needed".

Description

PR# 20118894: The Department of Homeland Security (DHS), Customs and Border Protection (CBP), Enterprise Services (ES), Office of Information Technology (OIT), Passenger System Program Directorate (PSPD) requires services to support the organizational processes that provide for internal controls, management oversight, and technical support for Process Management and Information Systems Security. The scope of work includes: Process Management - Process Management involves working to standardize and improve PSPD software development and maintenance processes and identify and incorporate best practices. These improvements will result in more accurate project planning, scheduling, and monitoring. Areas of focus will be quality control, Section 508 compliance, technical writing, directorate support, SharePoint, and responding to audit requests. Information Systems Security - Provide support to CBP Passenger Systems Program Directorate in areas of Information System Security. Activities will be in compliance with all federal security requirements to reduce risk to the enterprise. Work with teams inside of OIT and PSPD to review work products, verify compliance with all DHS and FISMA requirements, and DISAs Security Technical Implementation Guides (STIGs) and Security Requirements Guides (SRGs). Support will also include the need to create/add/update Authorization to Operate's for PSPD applications. This work is time sensitive and will require a schedule-driven approach to meet all milestones during the lifecycle. Coordination with the various teams will be key to success for this work area to include testing and addressing the security controls. Production Monitoring - Provide 24x7x365 support in monitoring application health for PSPD in support of the mission. This includes incident management when applications fail to meet SLA's. When applications alert the production monitoring support will alert the respect teams to remediate the incident as quickly as possible. Production monitoring will also work with the development teams and ensure all monitoring is in place before production deployments.
